

NICM SYMPOSIUM 2017

>> CLINICAL TRIALS IN INTEGRATIVE MEDICINE: CHALLENGES AND OPPORTUNITIES

NICM AND WESTERN SYDNEY UNIVERSITY WILL HOST A SYMPOSIUM ON CLINICAL TRIALS IN INTEGRATIVE MEDICINE: CHALLENGES AND OPPORTUNITIES ON 16 NOVEMBER 2017

Clinical trials in integrative medicine pose a unique challenge due to the complex nature of the interventions. This symposium will explore novel clinical trial designs, strategies for translation of evidence into practice and promoting collaborations between relevant research institutes, practitioners in the community, industry and government organisations both nationally and internationally.

Bringing together leading researchers, clinicians, practitioners, research collaborators and industry decision makers from around Australia, the symposium will explore key issues affecting the health and medical research and innovation sectors focusing on herbal medicine, acupuncture, and mind and body therapies.

KEY SPEAKERS

- >> Dr Allison Jones, Director, Complementary and OTC Medicines Branch, Therapeutic Goods Administration
- >> Professor Martin Stockler, Oncology Co-Director NHMRC Clinical Trials Centre, and Professor of Cancer Medicine and Clinical Epidemiology, Sydney Medical School, University of Sydney
- >> Professor Jian Ping Liu, Professor in Clinical Epidemiology and Director, Centre for Evidence-Based Chinese Medicine, Beijing University of Chinese Medicine
