Title of Project: Outcome Measurement on TCM Pattern Diagnosis in Patients with Cancer

(FOR Code/s): 1104

Supervisor: Dr Xiaoshu Zhu Contact: x.zhu@uws.edu.au
Co-supervisor: Prof Pingping Li (Beijing Cancer Hospital China) Contact: lppma123@sina.com

Location of Project: Campbelltown

Project Background

Many cancer patients or survivors use Chinese medicine (including herbal medicine and acupuncture) for managing adverse effects from conventional therapies [1, 2], however it is challenge to integrate biomedical evidence based methods into the framework of Chinese medicine, in particular its unique diagnostics, that is pattern differentiation.

Aim of Study:

To implement appropriately designed outcome measurements for TCM treatments that are reliable and valid.

Methods:

Mixed research methods will be employed for a design of outcome measurements in this project.

Ethics Application Requirements:

N/A
