

# COLD SORES AGAIN?

Could a natural treatment help?

**Would you like to be involved in a clinical trial to find out if a natural topical cold sore treatment helps to treat facial cold sores?**

A team of researchers from NICM Health Research Institute, Western Sydney University and Medical Research Institute of New Zealand are looking for men and women aged 18 to 65 to join a clinical trial to find out if a natural topical cold sore treatment helps reduce the duration and symptoms of common facial cold sores.

If it has been less than 48 hours since your cold sore started, and you've had at least three cold sores in your life, speak to the pharmacist or one of the other staff members for more information about the trial.
